(c) If an individual is receiving services in more than one county, the county of origin must be responsible for case management services unless otherwise negotiated and documented in writing with the mutually agreed upon conditions.

(d) Case management services require an impartial point of view to fulfill the necessary functions of planning, procuring, monitoring, and protective services. Except as allowed under subsection (e) of this section, the case management program must be provided under an organizational structure that separates case management from other direct services for individuals. This separation may take one of the following forms:

(A) The CDDP coordinates the delivery of family support services for children less than 18 years of age living in the family home or comprehensive in-home supports for adults.

(B) The CDDP determines that an organization providing direct services is no longer able to continue providing services or the organization providing direct services is no longer willing or able to continue providing services and no other organization is able or willing to continue operations on 30 days' notice.

(C) In order to develop new or expanded direct services for geographic service areas or populations because other local organizations are unwilling or unable to provide appropriate services.

(f) If the CDDP intends to perform direct services other than family support services or comprehensive in-home support, a variance must be prior authorized by the Department.

(A) It is assumed that the CDDP provides family support services or comprehensive in-home supports described in subsection (e)(A) of this section. If the CDDP does not provide one or both of these services, the CDDP must submit a written variance request to the Department for prior approval that describes how the services are going to be provided.

(A) Other developmental disabilities include autism, cerebral palsy, epilepsy, or other neurological disabling conditions that originate in and directly affect the brain.

(B) The individual must require training and support similar to that required by an individual with an intellectual disability, which means the individual has a composite or domain score that is at least two standard deviations below the mean, as measured on a standardized assessment of adaptive behavior administered by a licensed clinical or school psychologist, or a doctor of medicine or doctor of osteopathic medicine with specific training and experience in test interpretation of adaptive behavior scales.

(b) Significant impairment of adaptive behavior must be directly related to an other developmental disability and cannot be primarily attributed to other conditions including, but not limited to, a mental or emotional disorder, sensory impairment, motor impairment, substance abuse, personality disorder, learning disability, or ADHD.

(B) Areas of adaptive behavior include:

(i) Adaptive, self-care, or self-direction;

(ii) Receptive and expressive language or communication;

- (iii) Learning or cognition;
- (iv) Gross and fine motor; or

(C) The impairment, condition, or syndrome cannot be primarily attributed to other conditions including, but not limited to, a mental or emotional disorder, sensory impairment, motor impairment, substance abuse, personality disorder, learning disability, or ADHD.

(D) The condition and impairment must continue, or be expected to continue, indefinitely.

(b) REDETERMINATION OF ELIGIBILITY.

411-320-0120 Service Planning

(Amended 12/28/2014)

(1) PRINCIPLES FOR SERVICE PLANNING. This rule prescribes standards for the development and implementation of an ISP or Annual Plan. An ISP or Annual Plan must:

(a) Be developed in a manner consistent with the principles of self-determination;

(b) Be developed using a person-centered process and in a manner that addresses issues of independence, integration, and productivity;

(c) Enhance the quality of life of the individual with intellectual or developmental disabilities; and

(d) Be consistent with the following principles:

(A) Personal control and family participation. While the service system reflects the value of family member participation in the planning process, adult individuals have the right to make informed choices about the level of family member participation. It is the intent of this rule to fully support the provision of education about personal control and decision-making to individuals who are receiving services.

(B) Choice and preferences. The planning process is critical in determining the preferences of an individual and the family of the individual for services and supports. The preferences of the individual and the family of the individual must serve to guide the ISP team. The active participation of the individual and input must be facilitated throughout the planning process.

(C) Barriers. The planning process is designed to identify the types of services and supports necessary to achieve the preferences of an individual and the family of the individual, identify the barriers to providing those preferred services, and develop strategies for reducing the barriers.

(D) Health and safety. The planning process must also identify strategies to assist an individual in the exercise of the rights of the individual. This may create tensions between the freedom of choice and interventions necessary to protect the individual from harm. The ISP team must carefully nurture the exercise of the rights of the individual while being equally sensitive to protecting the health and safety of the individual.

(E) Children in alternate living situations. When planning for children in 24-hour residential settings or foster care, maintaining family connections is an important consideration. The following must apply:

(i) Unless contraindicated, there must be a goal for family reunification;

(ii) The number of moves or transfers must be kept to a minimum; and

(iii) If the placement of a child is distant from the family of the child, the services coordinator must continue to seek a placement that brings the child closer to the family.

(2) LEVEL OF CARE DETERMINATION

(a) A services coordinator must assure that an individual has a level of care determination prior to accessing Community First Choice state plan or waiver services. The level of care determination must be made using a Department prescribed form. An initial ISP authorizing Community First Choice state plan or waiver services must be completed no later than the end of the month following the month in which the level of care determination was made or no later than 45 days from the level of care determination.

(b) A services coordinator must assure that a level of care determination is reviewed for every individual enrolled in a comprehensive service:

(A) Within 12 months from the previous Annual Review,

(i) This review must be completed no later than 12 months from the Diagnosis and Evaluation Coordinator (D & E Coordinator) approval date.

(ii) The annual review date may be reset for a date earlier than 12 months from the D & E Coordinator approval

date, but not later than 12 months from the D & E Coordinator review date.

(B) No earlier than 60 days prior to the renewal of the ISP.

(C) Any time there is a significant change in a condition that qualified the individual for the level of care.

(c) The level of care assessment must be documented in a progress note in the service record for the individual.

(d) A level of care determination may be made by a services coordinator or a personal agent.

(3) FUNCTIONAL NEEDS ASSESSMENT. A services coordinator or personal agent must complete a functional needs assessment initially and at least annually for each individual who has or is expected to have an ISP.

(a) The functional needs assessment must be completed:

(A) Not more than 45 days from the date that the individual submitted a completed application or the date the CDDP learns of the eligibility of the individual for OHP Plus or OSIPM;

(B) Prior to the development of an initial ISP;

(C) Within 60 days prior to the annual renewal of an ISP; and

(D) Within 45 days from the date an individual requests a new functional needs assessment.

(b) An adult who is enrolled in comprehensive in-home supports as described in OAR chapter 411, division 330 or a child who is enrolled in in-home supports as described in OAR chapter 411, division 308 must participate in a functional needs assessment and provide information necessary to complete the functional needs assessments and reassessments within the time frame required by the Department.

(A) Failure to participate in the functional needs assessment or provide information necessary to complete the functional needs assessment or reassessment within the applicable time frame results in the denial of service eligibility. In the event service eligibility is denied, a written Notification of Planned Action must be provided as described in OAR 411-320-0175 and OAR chapter 411, division 318.

(B) The Department may allow additional time if circumstances beyond the control of the individual prevent timely participation in the functional needs assessment or timely submission of information necessary to complete the functional needs assessment or reassessment.

(c) No fewer than 14 days prior to conducting a functional needs assessment, the CDDP must mail a notice of the assessment process to the individual to be assessed. The notice must include a description and explanation of the assessment process and an explanation of the process for appealing the results of the assessment.

(4) INDIVIDUAL SUPPORT PLANS (ISP). Individuals enrolled in waiver or Community First Choice state plan services must have an ISP.

(a) A services coordinator and ISP team must develop the ISP with an individual within 90 days of the submission of a completed application by the individual and at least annually thereafter.

(b) Upon the request for a new functional needs assessment by an individual, a services coordinator must revise the ISP for the individual as needed if a revision of the ISP is requested by the individual. The revision of the ISP must be completed within 30 days from the new functional needs assessment. The revised ISP must be developed with the individual, the legal or designated representative of the individual (as applicable), and other invited ISP team members.

(C) The projected dates of when specific supports are to begin and end;

(F) Provider type;

(G) The setting in which the individual resides as chosen by the individual;

(H) The strengths and preferences of the individual;

(J) The services and supports (paid and unpaid) to assist the individual to achieve identified goals and the providers of the

services and supports, including voluntarily provided natural supports;

(K) The risk factors and the measures in place to minimize the risk factors, including back up plans for assistance with support and service needs;

(L) The identity of the person responsible for case management and monitoring the ISP;

(M) A provision to prevent unnecessary or inappropriate services; and

(N) The alternative settings considered by the individual.

(e) The ISP for an individual must be finalized and agreed to in writing by the individual, the legal or designated representative of the individual (as applicable), and others invited by the individual including, but not limited to, providers or other family members.

(f) The ISP must be made available using language, format, and presentation methods appropriate for effective communication according to the needs and abilities of the individual receiving services and the people important in supporting the individual.

(h) An ISP must be developed, implemented, and authorized as follows:

(7) PLAN FORMATS. An ISP or Annual Plan developed at an annual or update meeting must be conducted in a manner specified by the Department and on forms required by the Department. In the absence of a Department-mandated form, the CDDP with the affected providers may develop an ISP format that conforms to the rules for the provider and provides for an integrated plan across the funded developmental disability service settings.

(8) PLAN UPDATES. An ISP or Annual Plan must be kept current. A services coordinator, the residential services coordinator for the Department for children in 24-hour residential settings directly contracted with the Department, and CIIS services coordinators for children served through the CIIS waiver must ensure that a current ISP or Annual Plan is authorized and maintained for each individual receiving services.

Individuals with significant health and safety risks as identified in the ISP must have more frequent case management contact. At least one case management contact per year must be face to face. If an individual agrees, other case management contact may be made by telephone or by other interactive methods. The outcome of the case management contact must be recorded in the progress notes. The purpose of the case management contact is:

(c) Site visits may be increased for any of the following reasons including, but not limited to:

- (A) Increased certified and licensed capacity;
- (B) New individuals receiving services;

(g) When a provider is a Department-contracted and licensed, certified, and endorsed 24-hour residential setting for children and the children's residential services coordinator for the Department is assigned to monitor services, the children's residential services coordinator and the CDDP shall coordinate the site visit. If the site visit is made by Department staff, Department staff shall provide the results of the site visit to the local services coordinator.

(h) The Department may conduct site visits on a more frequent basis than described in this section based on program needs.

(3) MONITORING OF SERVICES: A services coordinator must conduct monitoring activities using the framework described in this section.

(a) For all individuals receiving case management at a CDDP with an ISP that authorizes waiver or Community First Choice state plan services, an ongoing review of the ISP must determine whether the actions identified by the ISP team are being implemented by the provider and others. The review of an ISP must include an assessment of the following:

(B) Are the personal, civil, and legal rights of the individual protected in accordance with these rules?

(C) Are the personal desires of the individual, and as applicable the legal or designated representative or family of the individual, addressed?

(D) Do the services provided for in the ISP continue to meet what is important to, and for, the individual?

(E) Do identified goals remain relevant and are the goals supported and being met?

(b) For an individual who is not enrolled in a Brokerage and who resides in a 24-hour residential setting, supported living setting, foster care, or is receiving employment services, the monitoring of services may be combined with the site visits described in section (2) of this rule. In addition:

(A) During a one year period, the services coordinator must review, at least once, services specific to health, safety, and behavior, using questions established by the Department.

(B) A semi-annual review of the process by which an individual accesses and utilizes funds must occur, using questions established by the Department. (C) The services coordinator must monitor reports of serious and unusual incidents.

(c) For an individual receiving employment services, the services coordinator must also assess the progress of the individual toward a path to employment.

(d) The frequency of service monitoring must be determined by the needs of an individual. Events identified in section (2)(c) of this rule provide indicators that may potentially increase the need for service monitoring.

(e) For an individual receiving only case management services and not enrolled in any other funded developmental disability services, the services coordinator must make contact with the individual at least once annually.

(A) Whenever possible, annual contact must be made in person. If annual contact is not made in person, a progress note in the service record must document how contact was achieved.

(4) MONITORING FOLLOW-UP. A services coordinator and the CDDP are responsible for ensuring the appropriate follow-up to monitoring of services, except in the instance of children in 24-hour residential settings directly contracted with the Department when the Department conducts the follow-up.

(a) If the services coordinator determines that comprehensive services are not being delivered as agreed in the ISP or Annual Plan for an individual or that the service needs of an individual have changed since the last review, the services coordinator must initiate action to update the ISP or Annual Plan of the individual.

(b) If there are concerns regarding the ability of a provider to provide services, the CDDP, in consultation with the services coordinator, must determine the need for technical assistance or other follow-up activities, such as coordination or provision of technical assistance, referral to the CDDP manager for consultation or corrective action, requesting assistance from the Department for licensing or other administrative support, or meeting with the executive director or board of directors of the provider.

(5) DEPARTMENT NOTIFICATION. In addition to conducting abuse or other investigations as necessary, the CDDP must notify the Department when:

(a) A provider demonstrates substantial failure to comply with any applicable licensing, certification, or endorsement rules for Department-funded programs;

(b) The CDDP finds a serious and current threat endangering the health, safety, or welfare of individuals in a program for which an immediate action by the Department is required; or

(a) The services and expenditures are minimally necessary to address the imminent health and safety risks associated with the support need of the individual;

Department shall consult with any CDDP, the Regional Crisis Diversion Program, or provider affected by this decision, prior to placement of the individual.

(8) ADMINISTRATION OF CRISIS DIVERSION SERVICES. The CDDP and the Regional Crisis Diversion Program must operate under policies and procedures that assure internal management control of expenditures. Policies and procedures must be written and include at least the following:

(B) Description of the circumstances for which crisis diversion services were requested to clearly specify how the individual is eligible to receive crisis diversion services;

(Amended 12/28/2014)

(1) When a dispute exists between a CDDP and a subcontracted provider regarding the terms of the contract or the interpretation of administrative rule and local dispute resolution efforts have been unsuccessful, either party may request assistance from the Department in mediating the dispute.

(a) The parties must demonstrate a spirit of cooperation, mutual respect, and good faith in all aspects of the mediation process.

Mediation must be conducted as follows:

(A) The party requesting mediation must send a written request to the Director of the Department, the CDDP Director, and the

Executive Director of the provider, unless other people are named as official contact people in the specific rule or contract under dispute. The request must describe the nature of the dispute and identify the specific rule or contract provisions that are central to the dispute.

(B) Department staff shall arrange the first meeting of the parties at the earliest possible date. The agenda for the first meeting shall include:

(i) Consideration of the need for services of an outside mediator. If the services of an unbiased mediator are desired, agreement shall be made on arrangements for obtaining these services;

(ii) Development of rules and procedures that shall be followed by all parties during the mediation; and

(iii) Agreement on a date by which mediation shall be completed, unless extended by mutual agreement.

(C) Unless otherwise agreed to by all parties:

(i) Each party shall be responsible for the compensation and expenses of their own employees and representatives; and

(ii) Costs that benefit the group, such as services of a mediator, rental of meeting space, purchase of snack food and beverage, etc. shall be shared equally by all parties.

(b) A written statement documenting the outcome of the mediation must be prepared. This statement must consist of a brief written statement signed by all parties or separate statements from each party declaring their position on the dispute at the conclusion of the mediation process. In the absence of written statements from other parties, the Department shall prepare the final report. A final report on each mediation must be retained on file at the Department.

(2) A provider may appeal the imposition of a disputed term or condition in the contract if the provider believes that the contract offered by the CDDP contains terms or conditions that are not substantially similar to those established by the Department in the model contract. The appeal of the imposition of the disputed terms or conditions must be in writing and sent to the Director of the Department within 30 days after the effective date of the contract requirement.

(a) A copy of the notice of appeal must be sent to the CDDP. The notice of appeal must include:

(A) A copy of the contract and any pertinent contract amendments;

(B) Identification of the specific terms that are in dispute; and

(C) A complete written explanation of the dissimilarity between terms.

(b) Upon receipt of the notice of appeal, the CDDP must suspend enforcement of compliance with any contract requirement under appeal by the provider until the appeal process is concluded.

(c) The Director of the Department must offer to mediate a solution in accordance with the procedure outlined in sections (1)(a) and (1)(b) of this rule.

(A) If a solution cannot be mediated, the Director of the Department shall declare an impasse through written notification to all parties and immediately appoint a panel to consider arguments from both parties. The panel must include, at a minimum:

(i) A representative from the Department;

(ii) A representative from another CDDP; and

(iii) A representative from another provider organization.

(B) The panel must meet with the parties, consider the respective arguments, and send written recommendations to the Director of the Department within 45 business days after an impasse is declared, unless the Director of the Department grants an extension.

(C) If an appeal requiring panel consideration has been received from more than one contractor, the Department may organize materials and discussion in any manner deemed necessary, including combining appeals from multiple contractors, to assist the panel in understanding the issues and operating efficiently.

(D) The Director of the Department must notify all parties of his or her decision within 15 business days from the receipt of the recommendations of the panel. The decision of the Department is final. The CDDP must take immediate action to amend contracts as needed to comply with the decision.

(d) Notwithstanding subsection (c) of this section, the Director of the Department has the right to deny the appeal or a portion of the appeal if, upon receipt and review of the notice of appeal, the Director of the Department finds that the contract language being contested is identical to the current language in the county financial assistance agreement with the Department.

(e) The CDDP or the contractor may request an expedited appeal process that provides a temporary resolution if it can be shown that the time needed to follow procedures to reach a final resolution would cause imminent risk of serious harm to individuals or organizations.

(A) The request must be made in writing to the Director of the Department. The request must describe the potential harm and level of risk that shall be incurred by following the appeal process.

(B) The Department must notify all parties of the decision to approve an expedited appeal process within two business days.

(C) If an expedited process is approved, the Department shall notify all parties of the decision concerning the dispute within three additional business days. The decision resulting from an expedited appeal process shall be binding, but temporary, pending completion of the appeal process. All parties must act according to the temporary decision until notified of a final decision.
