

The CM System Real Time Eligibility Process

CM real time eligibility overview.....	slide 2-3
Locked CM records.....	slide 4-5
How to send real time to MMIS.....	slide 6-9
DCMS	slide 10
When will real time eligibility will be turned off.....	slide 11

CM Real Time Eligibility Overview

- Adding or changing medical eligibility to MMIS can happen in “real time”
- Workers can choose to send the CM update to MMIS immediately
- If not sent real time to MMIS, the CM update will be sent during the regular overnight processing

CM Real Time Eligibility Overview, cont.

- Once sent to the new MMIS, the CM record is locked for the rest of the day.
- No further updates will be allowed to that CM case until the next day.

Locked CM record message

Locked records aren't all bad

- Health providers will be able to confirm medical eligibility immediately.
- Clients with emergent needs will be better served.

To send real time to MMIS, update as usual on CM. Press {F9} on SCMS

```

If the case is sent to MMIS in NA status

- MMIS will add the case as an NA case
- Clients will display with the new “NA” in-grant code on MMIS

DCMS is not going away

- DCMS is not going away completely
- DCMS will still work before the CM case information is sent to MMIS
- ***Be sure to check the SCMS screen before pressing {F9} and updating to MMIS***

FYI

- Sometimes real time eligibility will be turned off
- Usually real time eligibility will be turned off so that MMIS can add CM system end of month updates
 - For example: Compute deadline is January 27. Real time may be turned off January 28
- CM will still be up and running, but updates will occur during the overnight processing
